

IVAN PUGA MACIAS

Software Developer.

+593 991432632 

ipuga2201@gmail.com 

Guayaquil, Ecuador 

SUMMARY

Passionate Developer committed to expanding technical proficiencies and achieving excellence in software development. With a focus on delivering efficient, scalable solutions. Eager to embrace challenging projects that foster growth and innovation, I am dedicated to contributing positively to collaborative team environments. Proactive in staying updated on industry trends, I bring a dynamic blend of adaptability and analytical skills to drive project success.

EDUCATION

Salesian Polytechnic University
Engineer degree in software development.
2020 - 2024

SKILLS

- Frontend:** React, Next.js
- Backend:** Node.js, TypeScript, Java, Oracle JD Edwards
- AI:** Claude Code, LLM Integration, Prompt Engineering, AI APIs
- Cloud:** AWS (S3, Lambda, CloudFront), DigitalOcean, VPS
- Database:** Oracle, PostgreSQL, SQL Server, MySQL
- DevOps:** Docker, Linux, Nginx, Git

REFERENCES

- Mike Palma - Java Backend Developer - +593 995533415
- Alex Pluas - PHP Backend Developer - +593 987670012
- Andres Sellan - Javascript Backend Developer - +593 968628876

PROFESSIONAL EXPERIENCE

- Software Developer (Remote)**
Certifisa S.A. | 2022 - 2024
- Backend development using Oracle JD Edwards (Java)
 - Development of electronic invoicing modules
 - Implementation of new features and system enhancements
 - Bug fixing and maintenance of enterprise applications
- Software Developer (Remote)**
Iterlab S.A. | Present
- Full stack development using Node.js, TypeScript and React
 - Designed and integrated AI-powered features using LLM APIs
 - Developed AI-assisted workflows to automate business processes
 - Built REST APIs consumed by AI services and web applications

PROFESSIONAL PROJECTS

- CERTIFISA S.A. (CoreWare S.A.S.) | Software Developer (Remote)**
- Odoo - Oracle JD Edwards Integration (INPROEL)
 - Integration of ERP systems and process automation
 - Oracle JD Edwards Migration & Electronic Invoicing (FYBECA)
 - System migration and adaptation to electronic invoicing regulations
 - Nextcloud - Oracle JD Edwards Integration (CERTIFISA)
 - Implementation of document management and file attachment systems
- ITERLAB S.A. | Software Developer (Remote)**
- Developed full stack web applications using Node.js, TypeScript, React and Next.js.
 - Integrated AI capabilities into web applications using Large Language Models (LLMs).
 - Built AI-powered development workflows using Claude Code.
 - Integrated AI services through APIs to automate business processes.
 - Designed and developed REST APIs for scalable applications.
 - Deployed web applications using AWS services (S3, Lambda and CloudFront).
 - Managed Linux servers, Nginx configuration and VPS deployments on DigitalOcean.
 - Worked with PostgreSQL and SQL databases.
 - Collaborated in cloud infrastructure, deployment automation and production environments.
